Basic SEO

Common Keywords

A list of keywords that appear frequently in the text of your content.

Here are the most common keywords we found on the page:

forensic forensics digital analysis cyber cybersecurity science kerala cusat academy

SEO Description

SEO analysis of your page's meta-description.

The meta description is 181 characters long. Most search engines truncate descriptions longer than 160 characters. Jerald Benny - Digital Forensics and Cybersecurity professional with expertise in mobile and computer forensics, malware analysis, multimedia authentication, and biometric analysis.

Write a meta-description for your page. Use your target keyword(s) (in a natural way) and write with human readers in mind. Summarize the content - describe the topics your article discusses.

The description should stimulate reader interest and get them to click on the article. Think of it as a mini-advert for your content.

H1 Heading

SEO Analysis of the H1 Tags on your page.

One H1 tag was found on the page.

JERALD BENNY

H2 Headings

SEO analysis of the H2 headings on your page.

No H2 tag was found on the page.

Make sure you have a good balance of H2 tags to plain text in your content. Break the content down into logical sections, and use headings to introduce each new topic.

Also, try to include synonyms and relevant terminology in H2 tag text. Search engines are pretty smart - they know which words usually occur together in each niche.

It should be easy to include your main and supporting keywords in the H2 tags - after all, these keywords describe your content! If it's hard to work the keywords into your subheadings, it could be a sign that the keywords aren't closely related to your content.

Don't try to force keywords into sub-headings if they feel unnatural. It will send the wrong message to your readers, possibly driving them away.

Image ALT Attributes

SEO analysis of the "alt" attribute for image tags.

All images on the page have alt attributes.

Keywords in Title & Description

SEO analysis of the HTML page's Title and meta description content.

One or more common keywords were found in the title and description of the page.

title: forensic, forensics, digital, cyber, cybersecurity

description: forensic, forensics, digital, analysis, cyber, cybersecurity

Links Ratio

SEO analysis of the ratio of internal links to external links.

There are one or more issues with the number of links on this page:

Too few internal links (2).

internal: 2

external: 8

Add links to external resources that are useful for your readers. Make sure you link to high-quality sites - Google penalizes pages that link to "spammy" sites (ones that break the Google webmaster guidelines).

Ideally, the links should be highly relevant to the subject you're writing about. It's impossible to cover every aspect of a subject on a single page, but your readers may be fascinated by some detail you barely touch on. If you link to a resource where they can learn more, they'll be grateful. What's more, you'll be rewarded with higher rankings!

SEO Title

SEO analysis of the HTML title of the page.

The page title has 48 characters, which is good.

Jerald Benny | Digital Forensics & Cybersecurity

Create a responsive site

Our analysis of the use of CSS media queries in your content.

The CSS code contains **media queries**.

Homepage Is Reachable

Tests if your homepage is reachable by making an HTTP request.

Homepage is reachable

Advanced SEO

Search Preview

Here is how the site may appear in search results:

Jerald Benny | Digital Forensics & Cybersecurity

<https://jeraldbenny.qd.je/>

Jerald Benny - Digital Forensics and Cybersecurity professional with expertise in mobile and computer forensics, malware analysis, multimedia authentication, and biometric analysis.

Canonical Tag

Does the content have a "canonical" URL?

No canonical link tag found on the page.

null

Every page on your site should have a <link> tag with a "rel='canonical'" attribute. The link tag should go inside the page's head tag, and it should contain the page's "correct" URL.

If you've republished an article from another source (such as another site or a different section of your own site) then you need to pick which URL is the "correct" one and use that.

The Rank Math WordPress plugin makes it very easy to set the canonical URL for every page of your site.

Noindex Meta

Does the content contain a noindex robots meta tag?

The page does not contain any **index** meta tag or header.

Mobile Search Preview

Here is how the site may appear in search results on a mobile device:

<https://jeraldbenny.qd.je/>

Jerald Benny - Digital Forensics and Cybersecurity professional with expertise in mobile and computer forensics, malware analysis, multimedia authentication, and biometric analysis.

Mobile Snapshot

A snapshot of how your content appears on a mobile device.

WWW Canonicalization

Does the site appear on more than one URL?

Both www and non-www versions of the URL are redirected to the same site.

OpenGraph Meta

Does your site use OpenGraph meta tags?

Opengraph meta tags have been found.

Schema Meta Data

Does the content include relevant Schema.org metadata?

No Schema.org data found on the page.

The Rank Math WordPress plugin makes it extremely easy to add highly relevant Schema.org markup to your site. It has a simple graphical interface, so you don't have to get your hands dirty with complex HTML markup.

Sitemaps

Does the site use an XML sitemap?

The site has one or more sitemaps.

Robots.txt

Does your site have a valid robots.txt file

The site has a robots.txt file. Try our [free robots.txt editor tool](#) to easily test and validate your robots.txt file.

Keep your content fresh

Checks for recent content updates using available signals (XML sitemap, og:updated_time, or Last-Modified header).

The content is fresh. Last updated on 2026-07-11 (1 days ago) via XML Sitemap.

Broken Links

Detects broken or dead links (404/500 errors) in the website that may harm SEO and user trust.

Some link(s) are protected by bot mitigation services.

Performance

Page Size

An analysis of the size of your HTML file.

The size of the HTML document is 13 Kb, under the average HTML size of 33 Kb.

Response Time

How fast does your server respond to requests?

The response time is under 0.8 seconds which is great.

Image Headers Expire

Do your images use "expires" headers?

No local images found on the page

Minify CSS

Are your CSS files properly minified?

All CSS files appear to be minified.

Page Objects

Analysis of the embedded objects in the pages.

The page makes 2 requests.

```
total: 2
images: 1
javascript: 0
stylesheets: 1
```

Minify Javascript

Does the site use minified JavaScript?

All Javascript files appear to be minified.

Mobile Speed

How fast does your website respond to mobile users?

The page performance is good across all key metrics.

Security

Theme Visibility

Theme Visibility

The theme is not publicly visible, so it is not easily identifiable.

Visible Plugins

Visible Plugins

Hurray! None of the plugins are publicly visible.

Directory Listing

Does your web server list the contents of the directories?

Directory Listing seems to be disabled on the server.

Secure Connection

Is your content served over a secure connection?

The site is using a secure transfer protocol (https).
