## On-Page SEO Results

### Your On-Page SEO could be better

Your page has some level of On-Page SEO optimization but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

#### Title Tag

You have a Title Tag, but ideally it should be between 50 and 60 characters in length (including spaces).

Jerald Benny | Digital Forensics & Cybersecurity

Length : 48

Title Tags are very important for search engines to correctly understand and categorize your content.

#### Meta Description Tag

Your page has a Meta Description Tag however, your Meta Description should ideally be between 120 and 160 characters (including spaces).

Jerald Benny - Digital Forensics and Cybersecurity professional with expertise in mobile and computer forensics, malware analysis, multimedia authentication, and biometric analysis.

Length : 181

A Meta Description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

### Analytics

We could not detect an analytics tool installed on your page.

Website analytics tools like Google Analytics assist you in measuring, analyzing and ultimately improving traffic to your page.

### Schema.org Structured Data

We have not detected any usage of Schema.org on your page.

Schema.org is a structured data markup for webpages which helps Search Engines understand your site better and provide rich snippets directly in their search results.

## Generative Engine Optimization (GEO)

### Your Generative Engine Optimization needs improvement.

Your page is not well positioned for Generative Engine Optimization (GEO). GEO is important to ensure LLMs and AI Search Engines can effectively crawl your content and understand the underlying entity structure. Consider additional enhancements or you may be missing out on traffic from LLMs which are rapidly growing as a traffic source.

### Identity Schema New

No Organization or Person Schema identified on the page.

The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website and confidently answer brand, company or person queries.

## Rendered Content (LLM Readability) New

Your page has a low level of rendered content which tends to make it more readable for LLMs.

Rendering Percentage: 1%

## llms.txt New

## Usability

### Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

#### Device Rendering

*i*

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

### Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

### Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

### Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

The text on your page appears to be legible across devices.

### Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

## Performance Results

### Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

#### Website Load Speed

Your page loads in a reasonable amount of time.

#### Server Response
